DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 1. Claims 1-6, 10-15, 18, 20, 24, 26-29, 33 and 34 are rejected under 35 U.S.C. 102(a) as being anticipated by Santini, Jr. et al. (*Angew. Chem. Int. Ed.* 2000, 39, 2396-2407; hereinafter "Santini, Jr.").

Santini, Jr. discloses a microchip device having a primary electrode (anode) and a counter electrode (cathode) and a method for applying a time-varying potential. See Figures 2, 3, 7 and 10 and entire article. In reference to claim 14, the reference electrode is considered to be any other electrode.

2. Claims 17, 19, 21-23 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,797,898 to Santini, Jr. et al. (hereinafter "Santini, Jr. '898").

Santini, Jr. '898 discloses a microchip reservoir device having reservoirs 180, a primary electrode 120, a counter electrode 140 and a reference electrode (any other electrode). See Figure 5, col. 5, lines 5-27 and col. 5, line 64 through col. 6, line 4.

Application/Control Number: 09/975,786

Art Unit: 3763

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 7, 8, 9 and 30-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Santini, Jr. in view of Santini, Jr. '898.

In reference to claim 7, Santini, Jr. discloses the claimed invention except for the primary electrode to be made of a polymer. Santini, Jr. '898 discloses that the primary electrode can be made of a polymeric material as shown above. It would have been obvious to one of ordinary skill in the art to modify the invention of Santini, Jr. by making the primary electrode from a polymeric material, as suggested by Santini, Jr. '898 in order to achieve optimum results.

In reference to claims 8, 9 and 30-32, Santini Jr. discloses the claimed invention except for the environment that the device can be used in. Santini, Jr. '898 discloses that the device can be used in blood, *in vitro* or *in vivo*. See col. 3, lines 34-42 and 50-55. It would have been obvious to use the invention as described by Santini, Jr. in blood, *in vitro* or *in vivo* as suggested by Santini, Jr. '898 in order to provide multiple applications of the device.

Art Unit: 3763

Allowable Subject Matter

4. Claim 16 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark K Han whose telephone number is 703-308-4543. The examiner can normally be reached on Monday to Friday, 9 am to 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Casler can be reached on 703-308-3552. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9302 for regular communications and 703-872-9303 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0858.
